MIFID II product governance / Retail investors, professional investors and ECPs – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Securities has led to the conclusion that: (i) the target market for the Securities is eligible counterparties, professional clients and retail clients, each as defined in MiFID II; (ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Securities to retail clients are appropriate - investment advice, portfolio management and pure execution services, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Securities (a "**distributor**") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

What are the key risks that are specific to the issuer?

The Issuer is subject to the following key risks:

- *Risk that funds lent by the Issuer to Group Companies are not repaid:* The Issuer is a finance vehicle established by the Guarantor for the purpose of issuing debt securities, preferred securities (*participaciones preferentes*) and other financial instruments and on-lending the proceeds to the Guarantor and its consolidated subsidiaries (the "**Group**"). The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their loans in a timely fashion. Should any Group member fail to pay interest on or repay any loan in a timely fashion this could have a material adverse effect on the ability of the Issuer to fulfil its obligations under the Securities which could have an adverse impact on the rights of Securityholders and the return on their investment.
- *Certain Creditors of the Issuer will rank in priority above Securityholders:* Under Irish law, the claims of a limited category of preferential creditors will take priority over the claims of unsecured creditors in the event of the appointment of a liquidator or a receiver to an Irish company such as the Issuer. These preferred claims include taxes, such as income tax and corporation tax payable before the date of appointment of the liquidator or receiver and arrear of value added tax, together with accrued interest thereon and claims of employees.
- *Risks in connection with Examination:* Examination is a court procedure available under the Irish Companies Act 2014 to facilitate the survival of Irish companies in financial difficulties. The Issuer, the directors of the Issuer, a contingent, prospective or actual creditor of the Issuer, or shareholders of the Issuer holding, at the date of presentation of the petition, not less than one-tenth of the voting share capital of the Issuer, are each entitled to petition the court for the appointment of an examiner. The primary risks to the Securityholders if any examiner were to be appointed with respect to the Issuer are as follows: the potential for a scheme of arrangement being approved involving the writing down of the debt due by the Issuer to the Securityholders; and in the event that a scheme of arrangement is not approved and the Issuer subsequently goes into liquidation, the examiner's remuneration and expenses (including certain borrowings incurred by the examiner on behalf of the Issuer and approved by the relevant court) will take priority over the amounts secured or unsecured owing to the Securityholders.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- *The Group's growth, asset quality and profitability, among others, may be adversely affected by a slowdown in one or more of the economies in which the Group operates, as well as volatile macroeconomic and political conditions:* Volatile conditions in the global financial markets could also have a material adverse effect on the Group, including on the ability of the Group to access capital and liquidity on financial terms acceptable to the Group, if at all. If capital markets financing ceases to become available, or becomes excessively expensive, the Group may be forced to raise the rates paid on deposits to attract more customers and become unable to maintain certain liability maturities. Any such increase in capital markets funding availability or costs or in deposit rates could have a material adverse effect on its interest margins and liquidity. The Group's results are also affected by other market conditions on a

global and local scale, such as an increase in protectionism or trade tensions, higher barriers to immigration and the effects of the coronavirus

- *Among the risks that could negatively affect the economies and financial markets of the regions where the Group operates and lead to a slowdown of the global economy, recession, inflationary pressures and/or stagflation are (i) the continuance or escalation of the wars in Ukraine and the Middle East, (ii) increases in the prices of energy and other commodities, (iii) the breakdown of global supply chains and (iv) the return to tight monetary and fiscal policies, including by rising interest costs.*
- *The Group including the Guarantor is subject to extensive regulation and regulatory and governmental oversight which could adversely affect its business, operations and financial condition:* As a financial institution, the Group including the Guarantor is subject to extensive regulation (including regulation relating to capital requirements, funding and liquidity and the development of a fiscal and banking union in the EU), which materially affects its businesses. Any legislative or regulatory action and any resulting changes to the Group's business operations, as well as any deficiencies in its compliance with such legislation and regulation, could result in significant loss of revenue, limit its ability to pursue business opportunities and provide certain products and services, affect the value of assets that it holds, require the Group to increase its prices and therefore reduce demand for its products, impose additional compliance and other costs on the Group or otherwise adversely affect its businesses.
- *Increasingly stricter capital regulations and potential requirements could have an impact on the functioning of the Group and its businesses:* Increasingly onerous capital requirements constitute one of the Guarantor's main regulatory challenges. Increasing capital requirements may adversely affect the Guarantor's profitability and create regulatory risk associated with the possibility of failure to maintain required capital levels.
- *The credit quality of the loan portfolio of the Group may deteriorate and the Group's loan loss reserves could be insufficient to cover its loan losses, which could have a material adverse effect on the Group:* Non-performing or low credit quality loans have in the past negatively impacted the Group's results of operations and could do so in the future. In particular, the amount of the reported credit impaired loans of the Group may increase in the future as a result of growth in the Group's total loan portfolio, including as a result of loan portfolios that the Group may acquire in the future (the credit quality of which may turn out to be worse than it had anticipated), or factors outside of its control, such as adverse changes in the credit quality of the Group's borrowers and counterparties or a general deterioration in economic conditions in the regions where the Group operates or in global economic and political conditions, including as a result of the wars in Ukraine and the Middle East. If the Group was unable to control the level of its credit impaired or poor quality loans, this could have a material adverse effect on the Group's activities and operations and affect the ability of the Guarantor to fulfil its obligations under the Guarantee.

What are the key risks that are specific to the securities?

The Securities are subject to the following key risks:

- *The Securities bear the credit risk of the Issuer and the Guarantor:* Holders of Securities bear the credit risk of the Issuer and the Guarantor. That is the risk that the Issuer or the Guarantor is not able to meet its obligations under such Securities, irrespective of how any principal, interest or other payments under such Securities are to be calculated. In such circumstances holders may lose some or all of their investment.
- *Hedging activities may affect the market price, liquidity or value of the Securities:* The Issuer, the Guarantor and/or any of their affiliates may enter into one or more hedging transactions with respect to the Rate of Interest or related derivatives and such hedging activities or proprietary or other trading activities by the Issuer, the Guarantor or their affiliates may, but are not intended to, affect the market price, liquidity or value of the Securities and which could be deemed to be adverse to the interests of the holders.
- *The occurrence of certain events may adversely affect the value or liquidity of the Securities:* In the event of the occurrence of certain events, e.g. unavailability of the relevant Rate of Interest, the calculation agent may make adjustments in accordance with the terms of the Securities or, in certain cases, early redeem the Securities. Any such action may reduce the overall return on the investment of the holder or adversely affect the value and liquidity of the Securities.
- *Illiquidity of the Secondary Market:* There may be no secondary market for the Securities. If a secondary market does exist, it may be illiquid and investors may find it difficult to trade the Securities. The number of Securities of the series may be relatively small, further adversely affecting the liquidity of such Securities.
- *The value of the Notes is linked to the performance of the underlying Reference Item which may affect the overall return on investment:* A number of interest rates and other published values and indices that are "benchmarks" (including the Reference Item) are the subject of recent national and international regulatory guidance and proposals for reform. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely or have other consequences that cannot be predicted. Consequently, Holders may be exposed to the volatility in the performance of the Reference Item which may affect the overall return on their investment.

Quais são os principais riscos associados à Emitente?			
A Emitente está sujeita aos seguintes riscos principais: • <i>Risco de não reembolso dos fundos mutuados pela Emitente às Empresas do Grupo:</i> A Emitente é um veículo financeiro constituído pelo Garante com o objetivo de emitir títulos de dívida, títulos preferenciais (<i>participaciones preferentes</i>) e outros instrumentos financeiros para empréstimo dos seus proveitos ao Garante e às suas subsidiárias consolidadas (o "Grupo"). A Emitente está, portanto, dependente do pagamento de juros sobre os seus empréstimos e do reembolso dos mesmos em tempo útil por parte de outros membros do Grupo. Se qualquer membro do Grupo incumprir com a obrigação de pagar juros ou de reembolsar qualquer empréstimo atempadamente, tal poderá ter um efeito materialmente adverso na capacidade da Emitente para cumprir com as suas obrigações ao abrigo dos Valores Mobiliários, o que poderá ter um impacto adverso sobre os direitos dos titulares dos Valores Mobiliários e no retorno do seu investimento. • <i>Determinados Credores da Emitente terão prioridade sobre os titulares dos Valores Mobiliários:</i> Nos termos da lei irlandesa, os créditos de uma categoria limitada de credores preferenciais terão prioridade sobre os créditos de credores sem garantia caso haja lugar à nomeação de um liquidatário ou de um administrador para uma sociedade irlandesa como a Emitente. Estes créditos preferenciais incluem impostos, tais como o imposto sobre o rendimento das pessoas singulares e o imposto sobre o rendimento das pessoas coletivas que sejam devidos antes da data da nomeação do liquidatário ou do administrador da insolvência e o imposto sobre o valor acrescentado em dívida, juntamente com os respetivos juros acumulados e os créditos dos trabalhadores. • <i>Riscos associados ao processo de análise (Examination):</i> O processo de análise (<i>Examination</i>) é um procedimento judicial previsto na Lei das Sociedades Irlandesa de 2014 (<i>Irish Companies Act 2014</i>) para viabilizar a recuperação de empresas irlandesas em dificuldades financeiras. A Emitente, os administradores da Emitente, qualquer credor futuro, potencial ou efetivo da Emitente, ou os acionistas da Emitente que detenham, à data de apresentação do pedido, pelo menos, um décimo do capital social com direito de voto associado da Emitente, têm, cada um deles, o direito de apresentar junto do tribunal o pedido de nomeação de um examinador (<i>examiner</i>). Os principais riscos para os titulares dos Valores Mobiliários quando um examinador (<i>examiner</i>) é nomeado em relação à Emitente são os seguintes: a possibilidade de ser aprovado um acordo que implique a redução da dívida devida pela Emitente aos titulares dos Valores Mobiliários; e, caso não seja aprovado um acordo e a Emitente entre consequentemente em processo de liquidação, a remuneração e despesas do examinador (<i>examiner</i>) (incluindo certos empréstimos contraídos pelo examinador (<i>examiner</i>) em nome da Emitente e aprovados pelo tribunal relevante) terão prioridade sobre os montantes garantidos ou não por garantia real que sejam devidos aos titulares dos Valores Mobiliários.

Principais riscos relativos ao Garante: O Garante está sujeito aos seguintes riscos principais:

- *O crescimento, a qualidade dos ativos e a rentabilidade do Grupo, entre outros, podem ser afetados negativamente por um abrandamento numa ou mais das economias em que o Grupo opera, bem como por condições macroeconómicas e políticas voláteis:* As condições voláteis dos mercados financeiros a nível global poderão, também, ter um efeito materialmente adverso no Grupo, incluindo na sua capacidade de

acesso a capital e liquidez em termos financeiros aceitáveis, se é que o faz. Se o financiamento através do mercado de capitais deixar de estar disponível, ou se se tornar excessivamente oneroso, o Grupo poderá ser forçado a aumentar as taxas pagas sobre depósitos para atrair mais clientes e tornar-se incapaz de manter a maturidade de certos passivos. Qualquer aumento dos custos de disponibilidade ou de financiamento associados ao mercado de capitais ou das taxas de depósitos poderá ter um efeito materialmente adverso nas suas margens de juro e liquidez. Os resultados do Grupo podem também ser afetados por outras condições de mercado à escala global e local, tais como um aumento do protecionismo ou tensões comerciais, maiores entraves à imigração e os efeitos do coronavírus.

- *Entre os riscos que podem afetar negativamente as economias e os mercados financeiros das regiões onde o Grupo opera e levar a um abrandamento da economia global, recessão, pressões inflacionistas e/ou estagflação estão (i) a continuação ou escalada das guerras na Ucrânia e no Médio Oriente, (ii) aumentos nos preços da energia e de outras matérias-primas, (iii) a rutura das cadeias de abastecimento globais e (iv) o regresso a políticas monetárias e fiscais restritivas, incluindo através do aumento dos custos de juros.*
- *O Grupo, onde se inclui o Garante, está sujeito a regulamentação e supervisão regulamentar e governamental significativas que podem afetar negativamente os seus negócios, as suas operações e a sua condição financeira:* Como instituição financeira, o Grupo, onde se inclui o Garante, está sujeito a extensa regulamentação (incluindo regulamentação relativa a requisitos de capital, financiamento e liquidez e ao desenvolvimento de uma união fiscal e bancária na UE), o que afeta significativamente as suas atividades. Qualquer ação legislativa ou regulamentar e quaisquer outras de onde resultem alterações às operações comerciais do Grupo, bem como quaisquer irregularidades na sua conformidade com essa legislação e regulamentação, poderá resultar numa perda significativa de receitas, limitar a sua capacidade de prosseguir oportunidades de negócio e de oferecer determinados produtos e serviços, afetar o valor dos ativos que detém, impondo um aumento dos preços praticados pelo Grupo, com impacto, por conseguinte, na procura dos seus produtos, e um grau de cumprimento (*compliance*) e outros custos que poderão afetar negativamente a sua atividade.
- *Regulamentos de capital e potenciais requisitos cada vez mais rigorosos podem ter um impacto no funcionamento do Grupo e nas suas atividades:* Os requisitos de capital cada vez mais onerosos constituem um dos principais desafios a nível regulamentar do Garante. O aumento dos requisitos de capital poderá afetar adversamente a rentabilidade do Garante e criar um risco regulatório associado à possível incapacidade de manutenção dos níveis de capital exigidos.
- *Uma deterioração da qualidade do crédito da carteira de empréstimos do Grupo poderá tornar insuficientes as reservas para a cobertura de perdas para cobrir créditos em incumprimento, o que pode ter um efeito materialmente adverso para o Grupo:* Os créditos em incumprimento ou de baixa qualidade tiveram, no passado, um impacto negativo nos resultados das operações do Grupo, e poderão voltar a ter um impacto negativo no futuro. Em particular, o montante dos créditos em incumprimento comunicados pelo Grupo poderá aumentar no futuro, como resultado do crescimento da carteira atual de créditos do Grupo, incluindo como resultado de carteiras de créditos que o Grupo poderá adquirir no futuro (cuja qualidade de crédito poderá revelar-se pior do que previsto), ou fatores fora do seu controlo, tais como, alterações adversas na qualidade de crédito dos mutuários e contrapartes do Grupo ou uma deterioração geral das condições económicas nas regiões onde o Grupo opera ou nas condições económicas e políticas globais nível global, incluindo como resultado das guerras na Ucrânia e no Médio Oriente. Caso o Grupo não consiga controlar o nível dos seus empréstimos com risco de crédito ou de baixa qualidade, tal poderá ter um efeito adverso significativo nas atividades e operações do Grupo e afetar a capacidade do Garante para cumprir as suas obrigações ao abrigo da Garantia.

Quais são os principais riscos específicos dos valores mobiliários?

Os Valores Mobiliários estão sujeitos aos seguintes riscos principais:

- *Os Valores Mobiliários estão sujeitos ao risco de crédito da Emitente e do Garante:* Os titulares dos Valores Mobiliários estão sujeitos ao risco de crédito da Emitente e do Garante, ou seja, ao risco de a Emitente ou o Garante não serem capazes de cumprir as suas obrigações ao abrigo desses Valores Mobiliários, independentemente da forma de cálculo de qualquer capital, juros ou outros pagamentos ao abrigo desses Valores Mobiliários. Nessas circunstâncias, os titulares correm o risco de perder parte ou a totalidade do seu investimento.
- *As atividades de cobertura podem afetar o preço de mercado, a liquidez ou o valor dos Valores Mobiliários:* A Emitente, o Garante e/ou qualquer das suas afiliadas podem realizar uma ou mais transações de cobertura relativamente à Taxa de Juro ou aos derivados relacionados, podendo essas atividades de cobertura ou outras por parte da Emitente, do Garante ou das suas afiliadas (embora não se destinem a esse efeito) afetar o preço de mercado, a liquidez ou o valor dos Valores Mobiliários, podendo ser consideradas prejudiciais para os interesses dos titulares.
- *A ocorrência de determinados eventos pode afetar negativamente o valor ou a liquidez dos Valores Mobiliários:* Na eventualidade da ocorrência de determinados eventos, por exemplo, indisponibilidade da Taxa de Juro relevante, o agente de cálculo pode efetuar alterações de acordo com os termos dos Valores Mobiliários ou, em certos casos, proceder ao reembolso antecipado dos Valores Mobiliários. Qualquer ação deste tipo pode reduzir o retorno global do investimento do titular ou afetar negativamente o valor e a liquidez dos Valores Mobiliários.

- *Iliquidez do mercado secundário:* Poderá não existir um mercado secundário para os Valores Mobiliários. Na eventualidade de existência de um mercado secundário, este poderá ser ilíquido e os investidores poderão ter dificuldade em negociar os Valores Mobiliários. O número de Valores Mobiliários da série pode ser relativamente pequeno, afetando negativamente a liquidez desses Valores Mobiliários.
- *O desempenho passado da Taxa de Juro não é indicativo do seu desempenho futuro:* Existe o risco de a Taxa de Juro apresentar um desempenho distinto do desempenho anterior e, consequentemente, qualquer informação sobre o desempenho passado da Taxa de Juro na altura da emissão dos Valores Mobiliários não deve ser considerada como indicativa do intervalo de, ou tendências de flutuações na Taxa de Juro que possam ocorrer no futuro.
